- 24/7 unlimited and simultaneous circulation of the eReference collection
- On-demand machine-aided content translations into 14 languages

Gale Virtual Reference Library eBooks can function just like a printed book or a database.

You are able to browse a title's table of contents or the index or a list of illustrations to locate the desired information. E-reference titles provide you with basic search functionality that is simple to use. You are able to find terms through a keyword search, by article title or within the title of the source.

For a more advanced search, Gale Virtual Reference Library supports searches that combine criteria by:

Title, Keyword, Image Captions, Full Text, Source Titles, ISBN

Articles can be printed, e-mailed or displayed as PDF page layouts. Search results can be sorted by article title, by source, by relevance, or chronologically. Search terms are highlighted so your answers can be found quickly.

Subject areas include:
